Reasons for Allowance

1. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious the claimed recording medium structure.

While the prior art of record disclose recording media deemed to meet the claimed recitation of a magnetic layer with an hcp (101-2) plane parallel to the surface of the substrate and an easy magnetization axis meeting applicants' claimed "tilted" limitation, the prior art of record fails to teach or render obvious the use of an underlayer possessing an fcc lattice structure in combination with the disclosed magnetic layers, especially given the known impact on the crystal orientation that underlayers will have on subsequently deposited magnetic layers.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
